#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☒ Responsive to communication(s) filed on 29 July 2003.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## DETAILED ACTION

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, drawn to movable or rotatable display unit of a terminal device, classified in class 348, subclass 333.06.
- II. Claims 6-26, drawn to support or housing (rotary type hinge) of the terminal device, classified in class 348, subclass 373.

Inventions **II and I** are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the **invention I** has separate utility such as *"a lower body having a camera lens unit arranged in its one side, a first keypad arranged in its front side and a second keypad arranged in its rear side; and an upper body having a display device disposed in its front side, said upper body being coupled to an uppermost end of the lower body in such a manner that the upper body is allowed to rotate in a twisted direction with respect to a rotation axis extending in a longitudinal direction of the lower body"* which are not required by the **invention II**. Likewise, the **invention II** has separate utility such as *"a first hinge base having a hinge housing and first coupling arms extended laterally in opposite directions from a lower end of the hinge housing, the hinge housing defining a vertically extended receiving space; and a second hinge base having a rotating member and second coupling arms extended laterally in opposite directions from an upper end of the rotating member, the rotating*

*member being received inside the hinge housing to rotate therein relative to a rotation axis extending in a vertical direction of the first hinge base."* which are not required by the **invention I**. These separate **inventions I and II** are distinct for patentability. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

### ***Conclusion***
